

Injectronics THE LEADER IN AUTOMOTIVE ELECTRONICS

REPAIR SOLUTIONS

The proliferation of electronic and mechatronic products in today's modern vehicles requires a unique repair solution. Injectronics offer the most experienced team of technicians available to validate and repair a huge range of electronic and mechatronic components.

Injectronics prompt repair service enables the original failed component to be repaired and returned, enabling refitting to the original vehicle, saving workshops considerable time and money, while removing the need to additionally reprogram the product to the vehicle.

Injectronics repair service extends to all electronic and mechatronic parts of the vehicle, and the range offered is continually expanding.

- ABS modules
- Audio & navigation systems
- Body control modules
- Brake modules (electronic)
